bykovas@bykovas.lt

Short info about me

IT Director / System Architect with 25+ years of experience delivering scalable enterprise systems in manufacturing, ERP, logistics, and public-sector infrastructure. Proven track record in building and leading IT departments (20+ people), designing transparent, future-proof architectures, and managing infrastructure modernization across multiple locations. Delivered key systems for Shell (oil & gas logistics), LTU SEPA infrastructure, VMI and manufacturing MES platforms. Experienced in ITIL/COBIT-based process design, DevOps transformation, and driving technology strategies aligned with business expansion. Strong focus on system reliability, team growth, and international coordination. More info at: bykovas.github.io

Desired salary

5000 Eur (net / taxes excluded)

Job status

Possible start of work: After 20 calendar days

Work experience

2016 - Present Freelance / Contract / Public Sector, Vilnius

9 years 9 months

System Architect – Government & Enterprise

Led architecture and delivery of national-scale platforms across tax, banking, industry, manufacturing and infrastructure domains. Managed stakeholder alignment, infrastructure strategy, and cross-functional engineering teams (up to 20 FTE). • Tax Platform (VMI – EDS4): Designed modular architecture for electronic tax submission system (10M+ annual declarations), with regulatory compliance and department-level scalability. • Payments Infrastructure (Bank of Lithuania – Centrolink): Built SEPA platform integrating RT1, STEP2, TARGET, TIPS (EBA); handled 500k+ daily transactions under strict SLA. • Water Utility (Vilniaus Vandenys): Delivered embedded telemetry and vehicle access system with CV and cloud diagnostics for unmanned refill stations. • Oil & Gas (Shell via Flinke Folk): Delivered logistics and estimation platform for Shell's Norway and USA operations, coordinating cross-border teams and cost modeling tools. • B2B SaaS (SELL): Architected and implemented internal sales and operations platform covering inventory, team coordination, and client workflows.

2014 - 2017 Flinke Folk AS

3 years

CEO / Team Lead / Engineering Manager

Led Lithuanian engineering office (12+ developers) serving Norway-based clients in oil & gas sector. Built and delivered business-critical logistics and estimation systems for Shell and industry partners. • Delivered full-stack platform (routing, personnel logistics, cost modeling) for Shell's onshore operations. • Established CI/CD pipelines, streamlined DevOps processes, and ensured delivery within regulatory & operational constraints. • Defined engineering standards, recruited key team members, and coordinated delivery across time zones.

2004 - 2014 Various Enterprise Projects

10 years

Senior Developer & Systems Admin

Delivered end-to-end systems for document management, ERP, and payment processing across finance, manufacturing, and retail sectors. • BDO: Designed and implemented automated document workflows using SharePoint and Azure; improved compliance and reduced manual effort. • Lauresta: Developed and maintained a suite of 70+ ERP applications; managed full-stack on-prem infrastructure (Windows Server, Exchange, VMware). • Galeo / Luktarna: Engineered a distributed payment system across 400+ gas stations using C#, Java, and SQL Server; ensured 24/7 reliability and real-time reconciliation.

Education

2012 - 2014

Educational institution

2 years

Computer Engineering
Master

Computer knowledge

Core Skills Level  Expert

• Architecture: Microservices, Event-driven, CQRS, TOGAF • Tech: .NET Core, MS SQL, Oracle, Blazor, Vue, React • DevOps: CI/CD, Docker, Kubernetes, Proxmox, WireGuard • Management: Team building, Agile, cross-functional leadership • Security: OAuth2, JWT, secure integrations • Public Sector: Compliance, SEPA, tax, procurement systems

LKvitai.MES Level  Expert

<https://github.com/lkvitai/> • Manufacturing execution platform: .NET microservices, Node-RED, MQTT, Blazor/Vue dashboards, Azure.  Result: 60% fewer operator errors, real-time tracking.

Centrolink SEPA Level  Experienced

• National gateway: microservices for instant/standard payments (RT1, STEP2, TARGET).  Result: 500k+ tx/day, real-time performance, regulatory alignment.

EDS4 Tax Platform Level  Experienced

• Modular system for tax declarations, cross-agency workflows.  Result: 10M+ declarations/year, future-proof structure.

Oil & Gas Platform (Shell) Level  Experienced

• Multi-module platform supporting routing, logistics, and estimation workflows for Shell's field operations. • Developed with .NET / SQL Server, integrated with Azure AD and SharePoint-based collaboration • Enabled operational visibility and cost tracking across distributed teams in Norway, Malaysia, USA  Result: Enabled 24/7 logistics operations with automated routing and cost visibility
